

## + Aladdin SafeWord Authenticators

### Aladdin SafeWord Authenticators

With the push of a button, SafeWord tokens generate a highly secure, one-time password that can never be re-used, hacked, or otherwise compromised. The SafeWord password provides a secure two-factor authentication mechanism that ensures that only properly authenticated users are authorized access to critical applications and data. SafeWord offers a set of authenticator options, including hardware tokens and MobilePass software authenticators.

### Alpine Token

The Aladdin SafeWord Alpine token makes user authentication easier than ever. Alpine generates a highly secure one-time password, ensuring properly authenticated access to critical applications and data. The Alpine token works with SafeWord products as well as a wide range of industry remote access and network access solutions.

The Alpine token combines a sleek new compact design with the added feature of a sturdy clip for convenient attachment. Clip it on and carry your token with you anywhere for true zero-footprint user authentication. The Alpine token offers the strength and reliability you've come to expect from Aladdin, with unmatched authentication capabilities. Alpine tokens are compliant with OATH standards and are available in either event or time-synchronous authentication modes. A simple push of a button gives you a one-time password for a simple and secure login experience.

### Gold 3000

SafeWord Gold tokens offer the strongest two-factor authentication available. A user first activates the token on the keypad with a personal identification number (PIN), which prompts the token to provide a one-time, dynamic password. The user then enters the password into the Web or network application to perform authentication. The Gold 3000 comes in a convenient keyfob package and includes a larger, user-friendly display. Gold tokens also offer challenge-response capabilities.

### Lifetime Token Warranty

*Aladdin SafeWord 2008 tokens never expire and come with a lifetime token warranty. SafeWord eliminates the need to replace and deploy new tokens every three years and helps reduce your total cost of ownership. Simply return tokens at any time for a free replacement. You must be current on your support contract for all of your users to be eligible.*

## Key Features

### Function

- Event-synchronous and time-synchronous authentication options
- On-off button to preserve battery life
- Compliant with OATH standards
- Support for a wide range of authentication and access gateway solutions

### Form

- Sleek, compact design is ideal for consumer or enterprise authentication
- Unique carabiner-style clip for user convenience
- Crisp, easy-to-read password display
- Customizable color and branding options

## Aladdin MobilePass Software Authenticators

Aladdin MobilePass combines the security of proven two-factor authentication with the convenience of one-time passwords generated right on our personal mobile device or PC. MobilePass is an authentication solution that generates one-time passwords on a variety of popular mobile phone platforms, including Palm, BlackBerry, Windows Mobile, and Java ME-enabled devices. MobilePass also offers SMS-text message delivery of one-time passwords and is also available for Windows Desktops, where you can retrieve your one-time passcode from your laptop or desktop PC.

MobilePass offers a strikingly convenient and easy-to-use mechanism for one-time password delivery, making it even easier and more cost-effective to deploy two-factor authentication for your critical application and network access. MobilePass is completely integrated with SafeWord Two-Factor Authentication and leverages the same trusted authentication platform as our hardware token-based solutions. MobilePass also supports the latest 64-bit Windows platforms, including Windows Server 2008 and Vista.
