- Scales easily to thousands of concurrent users
- Integrates seamlessly into your enterprise
- Flexible data retention policy rules engine

OFFSITE

24/7 continuous backup of laptops from any location

Your Data Center or Your own hardware

Features and Specifications

PRO Server Requirements

MAC OS X

- OS X 10.4, 10.5, 10.6
- 1GB Memory, G5 or Intel

MICROSOFT WINDOWS

- 7, Vista, XP, Server 2008, 2003
- 1GB Memory, 1GHZ+ CPU

LINUX

- 2.6 Series Kernel
- 1GB Memory, 1GHZ+ CPU

VMWARE SYSTEM REQUIREMENTS

- Server or Fusion installed
- 2GB Memory, 2GHZ+ CPU

SOLARIS

- Solaris 10 or OpenSolaris
- 1GB Memory, 1GHZ+ CPU

PRO Client Requirements

MAC OS X

- OSX 10.4 or greater
- 1GB Memory, G5 or Intel

MICROSOFT WINDOWS

- 7, Vista, and XP
- Server 2000, 2003, and 2008
- 1GB Memory, 1GHZ+ CPU

LINUX

- 2.6 Series Kernel
- 1GB Memory, 1GHZ+ CPU

SOLARIS

- Solaris 10 or OpenSolaris
- 1GB Memory, 1GHZ+ CPU

CrashPlan PRO Client

Bullet-Proof Backup

- Continuous or scheduled
- Offsite and onsite destinations
- Incremental, unlimited versioning
- File compression & data de-duplication
- Background validation & verification
- Data verified 6x
