

8e6 MobileClient®

For Remote PC and Mac Laptops

The corporate world is becoming more remote and mobile every day. Driven by improvements in web-based applications, wireless technologies and laptop computers, large numbers of employees are working in smaller remote offices, at home or on the road. This has led to the problem of corporate IT staffs not having a comprehensive and cost effective solution to enforce corporate Internet use and security policies for remote or mobile devices. These environments require the same professional grade filtering and security available in their larger corporate sectors.

KEY FEATURES

Remote Security Web Filter

- Filters URLs, spyware, Instant Messaging, Peer-to-Peer and other emerging Internet threats
- Indirectly secures internal/local network against spyware, malware and other malicious content that come from unfiltered remote laptop computers
- Full library of URLs identifying IM and P2P
- IM and P2P application control
- Configurable user lockout
- Blocks access to anonymous proxies by URL

Centralized Web Use Reporting

- Centralized reporting using an M86 Enterprise Reporter
- Powerful cross-referenced and customized Web use reporting
- Reports by user name, machine name, IP address, and MAC address

Configuration and Integration

- Auto-network detection for a seamless internal and external Web filtering experience
- Centralized configuration and remote administration
- Transparent to user and tamper-proof

Remote Filtering Components

- 8e6 Mobile Client application
- R3000 mobile filtering appliance

System Requirements

- Windows XP and Vista
- Macintosh OS X Version 10.4 and higher

PROFESSIONAL GRADE FILTERING

Anywhere Any Connection Any Time

To address these urgent needs, M86 Security has developed its 8e6 Mobile Client to filter and secure off-site users from accessing inappropriate and malicious Web content. As a software-based application that works in conjunction with the R3000 Mobile appliance, it's simple to deploy, manage and maintain. Most importantly, the 8e6 Mobile Client provides centralized, seamless and tamperproof filtering for remote users anywhere, anytime, regardless of their Internet connection.

ABOUT M86 SECURITY

M86 Security is a global provider of Web and messaging security products, delivering comprehensive protection to more than 20,000 customers and over 16 million users worldwide. As one of the largest independent internet security companies, we have the expertise, product breadth and technology to protect organizations from both current and emerging threats. Our appliance, software and cloud-based solutions leverage real-time threat data to proactively secure customers' networks from malware and spam; protect their sensitive information; and maintain employee productivity. The company is based in Orange, California with international headquarters in London and offices worldwide. For more information about M86 Security, please visit www.m86security.com.
