**ONE PASSWORD IS ALL YOU NEED**

It's now easier than ever to login to your favorite websites and applications. StickApp Password Manager makes the process effortless by automatically saving, then entering your usernames and passwords. Simply deploy StickApp Password Manager to your users secure USB drive managed by SafeConsole, and get strong authentication to all applications, but only remember one password - the one of your USB drive.

**INCREASED EMPLOYEE PRODUCTIVITY**

A client-based alternative to Single Sign-On (SSO), StickApp Password Manager on a SafeConsoleReady Device delivers fast, simplified password management, solving the growing password inflation problem for your organization at a fraction of the cost of traditional SSO. Password Manager logs employees into their myriad applications (web based and Win32 based applications).

**ZERO-FOOTPRINT SECURE APP**

StickApp Password Manager is a best-of-breed application that requires no installation, it runs directly from the hardware-encrypted device. And when the SafeConsoleReady Device is locked, it leaves no logs, files or passwords behind. There is no need for any end-user training. The app appears directly in the device shortcut menu and is straight-forward to use.

**CENTRALLY DEPLOYED WITH SAFECONSOLE**

All SafeConsoleReady Applications are seamlessly deployed and managed from SafeConsole.

SafeConsole enables configuration settings to be "pushed" automatically to selected users, quickly and easily giving instant productivity and security gains. All Apps can be pre-configured giving a consistent user experience. StickApp Password Manager is delivered with a SafeConsole license with Authorized Autorun, this enables the IT administrator to make the application autostart upon login.

**KEY FEATURES**

**Fast, Easy Logins**

With just one-click from the StickApp Password Manager toolbar, you can automatically go to, and be logged into any favorite website or Application - there is no need to even open a browser or type the URL.

**Fill Forms Fast**

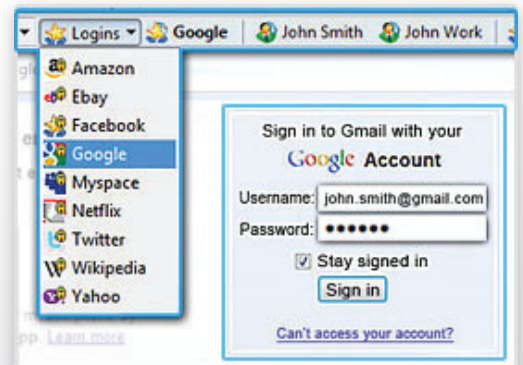

Use the Identities feature to securely store your name, address, email, phone numbers, credit cards - in fact any other personal information you choose to save and re-use.

**Strong Password Generator**

Strong passwords are essential for their logins to PayPal, Banking Websites and others. However strong passwords are just too hard to remember. With Password Generator this is no longer a problem. Select how strong you would like the password to be, click generate, and then Password Manager will store it securely for future use without you having to remember it!

**SafeConsoleReady Application**

Easy, automatic deployment and remote management with very high user acceptance.

**ABOUT SOFTEK**

StickApp Password Manager is powered by Roboform and modified by Softek for a seamless integration with SafeConsole. Since formation in 1994, Softek have been a 100% channel focused "Value Add Distributor", providing carefully selected IT Security Solutions and Professional Services to Channel Partners throughout the UK, Ireland and Channel Islands.
