SAFER CONNECTION VIA YOUR SECURE USB DEVICE

With StickApp VPN Client, you can now establish a secure connection to your private networks, such as your office network or home, directly from your secure USB device managed by SafeConsole. With StickApp VPN Client deployed on your secure USB device, the hardware-encrypted security of your device rubs off on your VPN – making it so much safer than traditional PC based clients.

WORK ANYWHERE IN THE WORLD

Working off-site has never been easier, or more secure! Get instant access to your files of need with StickApp VPN Client. Remote working is becoming more and more a necessity in today's work landscape, and StickApp VPN Client gives you the secure, cost effective solution to succeed.

ZERO-FOOTPRINT SECURE APP

StickApp VPN Client is a best-of-breed application that requires no installation, it runs directly from the hardware-encrypted device. And when the SafeConsoleReady Device is locked, it leaves no logs, files or passwords behind. There is no need for any end-user training. The app appears directly in the device shortcut menu and is straight-forward to use.

CENTRALLY DEPLOYED WITH SAFECONSOLE

All SafeConsoleReady Applications are seamlessly deployed and managed from SafeConsole. SafeConsole enables configuration settings to be “pushed” automatically to selected users, quickly and easily giving instant productivity and security gains. All Apps can be pre-configured giving a consistent user experience. StickApp VPN Client is delivered with a SafeConsole license with Authorized Autorun, this enables the IT administrator to make the application autostart upon login.

KEY FEATURES

Secure Connection

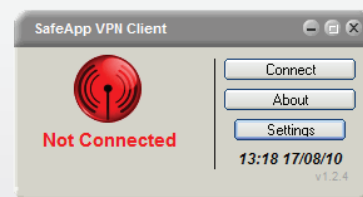

Secure VPN connection to your office/home from your secure USB device, as all your data is hardware-encrypted. StickApp VPN Client uses software compression and data encryption, and the PN PPTP Technology works with virtually all Firewalls.

Easy To Configure

StickApp VPN Client is easy to centrally setup/ configure for ongoing use. The VPN Settings can be completely hidden from users, and you can auto-assign IP address and DNS settings. The client can even be configured to request an optional PIN number for even further security.

SafeConsoleReady Application

Easy, automatic deployment and remote management with very high user acceptance.

ABOUT SOFTEK

StickApp VPN Client is powered by Portable VPN and modified by Softek for a seamless integration with SafeConsole. Since formation in 1994, Softek have been a 100% channel focused “Value Add Distributor”, providing carefully selected IT Security Solutions and Professional Services to Channel Partners throughout the UK, Ireland and Channel Islands.
