## **IT2Trust signs partnership agreement with Webroot**

*Partnership to deliver channel expansion in Denmark*

**Bracknell, UK. – x November, 2010** — Webroot, the first [Internet security](#) service company, has today announced IT2Trust A/S as a value added distribution partner for Denmark.

After evaluating the market and available Software-as-a-Service (SaaS) Security vendors IT2Trust chose Webroot as the leader in Email and Web Security services, offering the strongest technology, channel integrity and competitive advantage to bring to its channel partners.

IT2Trust is Denmark's leading distributor of business-critical solutions within IT Security and Networks. The company will introduce [Webroot® Email Security Service](#), [Webroot® Web Security Service](#) and [Webroot® Email Archiving Service](#) to the Danish channel through a series of campaigns, events and offers.

Ian Moyses, Webroot EMEA Channel Director said, "Webroot is 100 percent focused on its channel strategy and the company values the importance of its partner relationships. Identifying partners that extend channel integrity and values is essential for us as we grow in new markets. Denmark is an important expansion region for Webroot and having this partnership with IT2Trust will help us grow further into a new and important customer base."

Peter Boll, Managing Director at IT2Trust said, "We look to choose the very best solutions to bring to our channel partners and their customers. Evaluating our portfolio we came across Webroot and we were impressed by the strong security level, the ease of use and the commercial terms that Webroot offers to the reseller channel. We believe this will bring strong incremental revenue opportunity to our reseller partners and look forward to growing the Danish market alongside Webroot."

Webroot was recently the first vendor to be awarded the West Coast Labs Platinum Product Award for Checkmark Web Threats Certification for its Web security service.

### **Webroot's Security Services include:**

[Webroot® Email Security Service](#) delivers enterprise-class security with better manageability, better value and better protection than on-premise email security solutions. Businesses can get the most advanced protection against spam, viruses and data loss without the hassle of managing additional hardware or software—all at a lower total cost of ownership.

[Webroot® Web Security Service](#) offers URL and web content filtering, plus protection against web-based malware threats for corporate and mobile users. Services are easy to deploy, require no additional hardware or software, and can be purchased as separate modules or as a comprehensive Web security solution.

[Webroot® Email Archiving Service](#) is a fully managed, web-based service designed to meet and exceed your email archiving needs. With no hardware or software to purchase and manage, this comprehensive solution provides the advanced benefits of e-discovery and mailbox management solutions – at a fraction of the cost of an on-premise system.
