

# Gain Unprecedented Visibility and Intelligence

## of Your Attack Surface

### Be Smarter

Gain the advantage over attackers with advanced vulnerability and threat intelligence

### See & Understand

Zoom in on security control gaps with comprehensive network modeling, attack vector analytics and advanced attack surface visualization technology

### Act Quickly

Protect important systems and data in minutes with remediation plans right for your network and the threats it faces

The award-winning Skybox™ Security Suite provides the broadest set of solutions for security operations, analytics and reporting all from one platform.

- Improve and streamline security management with six deeply integrated modules
- Break down silos of data by integrating with 100+ network and security technologies
- Use network modeling, attack vector analytics and attack surface visualization for on-demand analysis without network disruption
- Automate complex security processes around vulnerability, threat and security policy management

## SKYBOX™ SECURITY SUITE

Integrated Security Analytics

### Skybox Horizon

#### Attack Surface Visualization

Understand your entire network and biggest threats in a glance, and track risk-fighting progress over time

### Vulnerability Control

#### Threat-Centric Vulnerability Management

Use knowledge of your network and threat intelligence to respond in context to real-world threats and potential attack vectors

### Threat Manager

#### Threat Intelligence Analysis and Response

Correlate threat intelligence with your network context to know what assets are at stake and where to begin response

### Firewall Assurance

#### Comprehensive Multi-Vendor Firewall Management

Bring your entire firewall estate into one view and continuously monitor compliance and performance

### Network Assurance

#### Total Network Visibility and Control

Illuminate physical, virtual and cloud networks, complex security zones and compliance violations while improving connectivity and security

### Change Manager

#### Secure, Automated Firewall Change Workflow

Automate the entire firewall change management process and assess risk before changes are implemented
